To remove any dust that may have accumulated during packaging, wipe the exterior with a clean, damp cloth.

About Your Panini Maker

The English translation of Panini means little breads, or rolls, and is equated with sandwiches. In the United States, Panini has come to denote a grilled Italian sandwich.

The Panini sandwiches of today are generally made using fresh, crusty Italian breads. Your Panini Maker uses the weight of the heated upper grill plate to grill both sides at the same time. Use your Panini Maker to prepare authentic Italian Paninis and Cuban sandwiches, as well as to grill poultry, meat, fish, sausages, and a variety of other foods. Your Panini Maker is designed to sear foods perfectly. The special hinged top plate inherent on all Panini grills allows the grill to be used on extra thick sandwiches and food items.

Using Your Panini Maker

Your Panini Maker is best used with thick, crusty breads, such as French, Italian, and focaccia. The top grill plate is weighted to compress and grill a Panini to perfection in about 3 minutes (depending on the bread, filling, and personal taste). Your Panini Maker can also be used to grill a variety of food items, such as meats, poultry, fish, and vegetables.

- 1 Completely pull out Drip Tray prior to use.** Place drip tray underneath grease channel so that any drippings will fall into the tray.
- 2 Preheat the grill to the desired temperature.** Your grill will not properly preheat unless the grill is in the closed position. Close the cover and plug into a 120-volt 60 HZ AC outlet only. The red light will turn on indicating that the appliance is preheating. After approximately 8 minutes, the green light will turn on indicating that the appliance is preheated and ready for use.
- 3** Open the lid using the black handle only, being careful not to touch any hot surfaces such as the housing or grill plates. We recommend the use of oven mitts or potholders to prevent the risk of injury.
- 4** Place items to be cooked on the bottom grill plate.
- 5** Lower the cover and cook the food according to desired temperature or doneness. Do not apply excessive force to close the lid and do not lock latch on handle.

Note: The green ready light is thermostatically controlled and will cycle on and off during cooking to ensure that the correct temperature is maintained.

Important: Grill only with the lid in the closed position.

- 6** When you have finished using your appliance, unplug power cord from outlet and allow the unit to cool down completely before cleaning.

Helpful Hints

- Be sure to always wash the grill plates after each use to remove any residue that may have accumulated.
- Do not use sharp objects or attempt to cut food on top of the grill plates.
- **Always preheat for 8 minutes until the green ready light illuminates before use. Have all ingredients in place before cooking starts.**
- For best results, spread mayonnaise on both outer sides of panini sandwiches before cooking. This will give darker, crustier grill marks on the bread.
- Do not use metal utensils, as this may damage the nonstick surface of the grill plates.
- If additional sandwiches are desired, lower the lid to preserve the heat while you prepare the additional sandwiches.
- Let sandwiches cool slightly before eating. Cheese, especially, becomes very hot. Soft or melted fillings will firm slightly.
- For easy storage, use the cord wrap on the underside of the unit. Your Panini Maker is designed to stand vertically, taking up the least amount of storage space. See figure 4.
- For easy cleanup, you can lay your food on a piece of parchment paper, leaving a two-inch border on each side. Place a second piece of parchment paper over your food, fold three sides in, and press to make a sealed seam. Fold in one more time and press. Load packet onto the panini with open end positioned over the drip tray so fat can freely flow into the tray.

Before cleaning and when finished using your appliance, unplug power cord from outlet and allow to cool completely. Before cleaning and when finished using your appliance, unplug power cord from outlet and allow to cool completely. Wipe the inside and the edges of the grilling plates with a clean, damp cloth. To remove stubborn stains or food, use the nylon brush included with your unit, or other utensils regarded as safe for nonstick surfaces.

Do not use steel wool or scouring pads. Do not use abrasive cleansers. Wipe the exterior with a clean, damp cloth. Dry all parts thoroughly before using again or storing.
